(54) Title: TIME DOMAIN RESOLVING CHEMICAL SAMPLER USING SORBENT MATERIAL

(57) Abstract: A fluid sampling device is provided comprising an elongated housing having a longitudinal axis, a plurality of alternating sorbent units and spacer units disposed longitudinally through the housing and slidably movable therethrough along the longitudinal direction, and means for individually and sequentially exposing the sorbent units to a fluid. The adsorbed components can then be desorbed and analyzed to provide composition data of target compounds in a fluid, e.g., a gas, over a period of time.

## INTERNATIONAL SEARCH REPORT

International application No.

PCT/US04/19402

| Box No. II   | Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)  |  |  |
|--|--|--|--|
| This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons: |  |  |  |
| 1.   | Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:  |  |  |
| 2.   | Claims Nos.: because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:   |  |  |
| 3.   | Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).   |  |  |
| Box No. III  | Observations where unity of invention is lacking (Continuation of item 3 of first sheet)   |  |  |
|  | ional Searching Authority found multiple inventions in this international application, as follows:  ontinuation Sheet  As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.  As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite |  |  |
| 3.   | payment of any additional fee.  As only some of the required additional search fees were timely paid by the applicant, this international search report  |  |  |
| 4.   | covers only those claims for which fees were paid, specifically claims Nos.:  No required additional search fees were timely paid by the applicant. Consequently, this international search report is  |  |  |
|  | restricted to the invention first mentioned in the claims; it is covered by claims Nos.: 1-18  |  |  |
| Remark on Protest The additional search fees were accompanied by the applicant's protest.  |  |  |  |
| 1  | No protest accompanied the payment of additional search fees.  |  |  |

|   |  |  |  |  |
|   |  |  |  |  |
|   |  |  |  |  |
| BOX III. OBSERVATIONS WHERE UNITY OF INVENTION IS LACKING  This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid.  |  |  |  |  |
| Group I, claim(s) 1-18, drawn to a device for fluid sampling.   |  |  |  |  |
| Group II, claim(s) 19-32, drawn to a method for sequential sampling.  |  |  |  |  |
| The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:  |  |  |  |  |
| The inventions listed as Groups I, and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:   |  |  |  |  |
| The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the fluid sampling device can be used without the method of moving the stack of sorbent units and spacer units longitudinally through the housing to position a following individual sorbent unit into alignment with the fluid inlet apaerture. |  |  |  |  |
